Honorable Walter Williams
Acting Secretary of Commerce
Department of Commerce
Washington 25, D. C.

Dear Mr. Secretary:

Thank you for your letter of 10 September in which you informed us that the Bureau of Public Roads will report as excess to the General Services Administration a tract of land in the Langley, Virginia area upon which we propose to erect our new Headquarters building.

I should like to express my appreciation for the fine spirit of cooperation that has been evident in all dealings with members of your staff, and in particular Mr. Spelman, Division Engineer. We shall, of course, continue to work closely with the Bureau in designing the interchange from the George Washington Memorial Parkway so as to serve your research station at Langley as well as our new building.

Sincerely,

10

C. P. Cahell
Lieutenant General, USAF
Acting Director
